Hansen Ergonomics Studio is questioning the **office design** issue as one essential matter in today's society. The contemporary brand is paying particular attention to **ergonomics** and **quality** of products considered in defining **space**.

From eight in the morning till whatever-it-takes-to-make-things-work, our working time is a part of our lifetime. If we are to cultivate balance and happiness in our life, we need to take care of space where all the magic happens: the office.

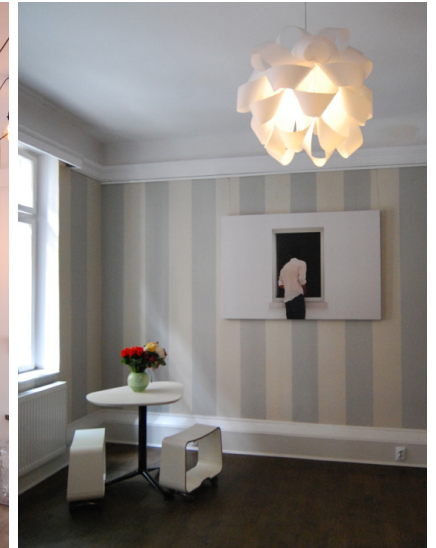

Beauty and ergonomics for a balanced **office life**.

**We believe that through design,
ergonomics and passion, there
is life after weekend.**

We are Hansen and we believe that the office
you spend most of your day in needs to reflect
your personality, to inspire your work and be
the space you want to come back to.

*there is a life after weekend
